

YOU ARE INVITED!

New Hampton Community Broadband Chamber “Lunch and Learn”

Wednesday, September 7, 2016

12:00pm

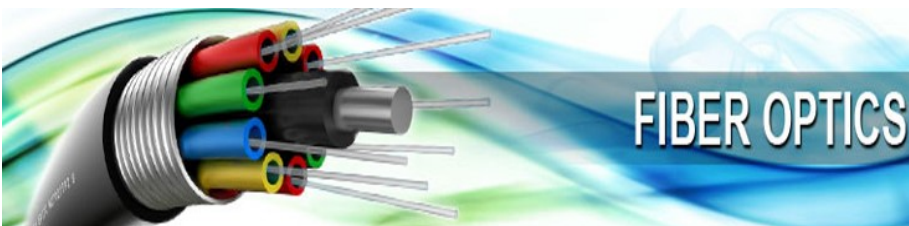

Community Room, New Hampton City Hall

New Hampton is conducting a **Community Broadband Engagement and Education Project**. The overall goal of the project is to determine whether there is sufficient interest in a community broadband project to justify investing in a detailed feasibility study. We are engaging New Hampton residents in a dialogue about the current state of broadband services in the community; educating the community about the lasting benefits of fast, affordable, reliable, and universal broadband; measuring community interest in a community broadband project; and provide leaders with information needed to determine next steps.

The Chamber “Lunch and Learn” is one of several gatherings with various stakeholder groups in New Hampton. The session will be led by Curtis Dean of SmartSource Consulting, who has been working on behalf of community broadband networks for 18 years. Curtis is a past resident of Spencer, Iowa and was active in both the Chamber of Commerce and Main Street Iowa programs.

Following a brief presentation, attendees will have the opportunity to provide feedback on the concept of a community fiber broadband network, discuss their needs and relate any challenges or issues they’ve had with existing providers.

A light lunch will be provided at no charge. **Please RSVP to curtis@smartsourceconsulting.com if you will be able to join us for lunch.**
